WORK EXPERIENCE

Impresst Business Services

Nov 2024 – Present

Jr. Software Engineer

Burtonsville, MD

- Contributed to the development of a new SaaS platform aimed at streamlining industry-specific workflows, working on feature implementation and system reliability using the ASP.NET platform and modern front-end tooling.
- Debugged and maintained legacy software built with ASP.NET Web Forms, improving performance and stability within a complex codebase.
- Led and supported IT infrastructure projects, including email migrations, VoIP system upgrades, and resolving network issues across the organization.
- Bridged technical and operational needs by collaborating with cross-functional teams, while also handling administrative tasks such as job scheduling, purchase orders, and customer communications.

Assured Services Inc.

Aug 2025 – Jun 2025

Administrative Assistant

Burtonsville, MD

- Promoted to expanded office operations responsibilities within 3 months based on performance, reliability, and ability to manage increasing administrative and operational duties.
- Coordinated daily crew scheduling and work assignments for field personnel, ensuring efficient project execution and resource allocation.

Q Computers

Jun 2024 – Nov 2024

IT Specialist

Ashburn, VA

- Set up and configured servers and connected devices to establish secure LAN networks.
- Maintained and updated documentation, detailing daily tasks and configurations performed for client projects.

EDUCATION

Johns Hopkins University

Jan 2025 – Dec 2029

M.S. Information Systems Engineering

Baltimore, MD

- Pursuing a master's degree in information systems engineering at Johns Hopkins starting Spring 2025, specializing in the software engineering track.

University of Maryland

Aug 2019 – May 2024

B.S. Computer Science

College Park/ Adelphi, MD

- Completed a variety of academic software projects including Blackjack and Battleship games (Java, Ruby), a reservation system (Java), and a full compiler implementation (OCaml, C), applying object-oriented design, data structures, and systems programming concepts.
